This section contains each respective Contractor's schedule of items.

### SECTION B – SUPPLIES OR SERVICES AND PRICE

**B.1 Scope of Work** The Contractor, as an independent Contractor, and not an agent of the Government shall setup, maintain, and manage an Electronic Commodities Store III (ECS III) providing Commercial-Off-The-Shelf (COTS) desktop, laptop, handheld computing devices (including peripherals), workstations, software, networking equipment, commercial telecommunications equipment items related to telephony, including but not limited to (network routers, switches, repeaters, and cabling), scientific research workstations, and other electronic devices and systems, software (including operating systems), related warranty and maintenance services, and support services ancillary to these items to assist the National Institutes of Health (NIH) and other Federal Government agencies in accomplishing their mission.

**B.1.1 The Service Contract Act** The Service Contract Act does not apply to this contract.

**B.2 Schedule Of Items** The ECS III contract is a Fixed Price, Indefinite Delivery, Indefinite Quantity type contract. The Contractor must provide the NIH and other Federal Government agencies with a full range of commercial off-the-shelf hardware, software, documentation, maintenance, peripherals, training, supplies and related support services, in accordance with the Specifications identified in Section C for the schedule of items it is offering.

When providing changes to the schedule of items it is offering, the Contractor shall review the Specifications in Section C and provide a clear description of each Contract Line Item offered by its company, including the Original Equipment Manufacturer (OEM); OEM Part/Model Number; Contractor Part/Model Number if different from the OEM Part Number; and a description of all Information Technology (IT) resources offered. It is the Contractor's responsibility to identify the IT resources that will be available through the NIH ECS III. Contract Line Items and any associated Enterprise License Agreement (ELA) on this contract must be within the scope of the existing terms and conditions of the ECS III contract.

**B.2.1 Price Tables/Lots** The tables provided are samples to be used by the Contractors to prepare new contract line item proposals. Three price table formats are available for vendor use. The Streamlined price table formats covers all possible CLIN proposal actions: Add, Delete, Price Increase, Price Decrease, and Administrative Changes. The Contractor must provide price tables that contain the columns described below for all Lots as applicable for each CLIN proposal action. All of the items or services offered, with the exception of open market items, for which the Contractors expect to receive compensation (i.e., payment), must appear in these price tables. If there is no explicit charge associated with a particular item or service, "N/C" (i.e., No Charge) shall be noted in the Product Description column and "0" (zero) placed in the price column. If an item is associated with one or more ELAs, the number of ELAs it is associated with must be clearly indicated on the price table and the ELA ID Number, Title, and Manufacturer for each ELA entered into an ELA Form (Attachment Number JA.1 contains the ELA Form and specific instructions). The ELA Form shall be attached to the price table along with a copy of each ELA. The information required for each column of the price tables for is defined below in Section B.2.1.2.

### B.2.1.1 Downloadable Sample of Pricing Table (Excel Format):

ECS III Add/Delete Price Table (see Attachment JT.1)

ECS III Price Increase Price Table (see Attachment JT.2)

ECS III Streamlined Price Table (see Attachment JT.3)

### B.2.1.2 Column Descriptions for the ECS III Price Table:

CLINs proposed for addition to, deletion from, price increase or decrease, or administrative changes on the contract must contain the information in column descriptions below where “require” is specified for that CLIN Action. All other columns are optional.

Column 1 – CLIN Action. (Required for all) In this column, the Contractor shall enter whether the CLIN is being added, deleted, increased or decreased in price, or if this is an administrative change such as an update to the product description. (Values: A = Add, D = Delete, PI = Price Increase, PD = Price Decrease, AC = Administrative Change)

Column 2 – Lot. (Required for CLIN Action “A”) In this column, the Contractor shall enter the Lot number for the product being proposed. (A single price table can be submitted for all lots being proposed.)

Column 3 - Contract Line Item Number (CLIN). (Required for all) The CLIN must be a unique number that is only associated with one item for the life of the vendor’s contract. (An example of CLIN syntax for Lot 1 items in the price table might be: 100001, 100002, 100003, etc. Ending the CLIN with a sequential number helps to make the number unique. However, the number may follow any syntax of the vendor’s choosing as long it is unique across the entire vendor contract schedule of items.)

Column 4 - OEM Name. (Required for all) In this column, the Contractor shall identify the name of the Original Equipment Manufacturer (OEM) for the CLIN.

Column 5 – OEM Model #. (Optional) Enter the specific equipment model numbers for all equipment components for the CLIN. (For example, manufacturer server model “3000” series, where “3000” is the model number.)

Column 6 – OEM Part # /ID #. (Required for all) Enter the specific OEM part numbers for all equipment components for the CLIN. (For example, Q5420BB. This number allows the NITAAC Contracting Officer to clearly identify the item and its commercial availability and pricing.)

Column 7 – Contractor ID #. (Optional) If desired, enter the specific equipment identification number used for Contractor tracking of the product.

Avoid technical abbreviations and jargon by using common language whenever possible. If volume discounts are offered, also enter the quantity range that is applicable for the offered price i.e. (1 - 10), (11 - 20). Each price break must be listed under a separate Contract Line

Item Number. If detailed information is provided in the next column (Technical Industry Specifications (TIS)), a general product description is sufficient here, such as "Laptop.")

Column 9 – Technical Industry Specifications (TIS). (Optional) List the technical specifications for the product, or a TIS website Uniform Resource Locator (URL) where TIS specification information can be located, or "See Attached copy of Catalog Item". (The following is an example of TIS: Pentium M 1.4GHz, 14.0" XGA, 256MB SDRAM, 40GB, DVD, V.90/56K Modem, 10/100 Ethernet LAN, Wi-Fi, USB FDD, 9 cell battery, Win XP Pro.)

Column 10 – Unit. (Required for CLIN Action "A") Specify the unit of the item for which the ECS III price is based. (For example, each, roll, box, case, etc. Most items will have a unit of "each.")

Column 11 –Quantity. (Required for CLIN Action "A") Specify the quantity of items for which the ECS III price is based. If the price offered is based upon a quantity of one (1) enter (1).

Column 12 - ECS Price. (Required) Enter the Electronic Commodities Store III price proposed for each IT Resource included in the price tables.

Column 13 - GSA Contract Number. (Conditional - required for CLIN Action "A" if Catalog/List Price is NOT provided.) Enter the GSA schedule contract number for all equipment and components included in the price tables.

Column 14 - GSA Schedule Price. (Conditional - required for CLIN Action "A" if Catalog/List Price is NOT provided.) This column applies only if the product is on a GSA schedule. This includes schedule contracts with the OEM and Schedule contracts with the Contractor. Enter the GSA price for all equipment and components included in the price tables.

Column 15 – Catalog List Price. (Conditional - required for CLIN Action "A" if GSA Schedule Price is NOT provided.) Enter the price for the product that would be offered to the general public. (See FAR 2.101 "Commercial Item" (6)(i).) This is the contractor catalog price or manufacturer's list price for the CLIN.

Column 16 – Number of Associated ELAs. (Optional) If the CLIN is associated with one or more ELAs, the Contractor shall enter the number of ELAs in this column. If it is not applicable, enter "0" (zero) or leave this column blank. In addition, the Contractor must attach a completed ELA Form to the price table. (See Attachment Number JA.1 for ELA Form instructions.)

Column 17 – EPEAT Compliant. (Optional) If the item is EPEAT compliant, the Contractor may enter the level of EPEAT qualification (Silver, Bronze, Gold) in this column.

## SECTION C – STATEMENT OF WORK/SPECIFICATIONS

---

### C.1. OBJECTIVE.

C.1.1 This Specification defines the NIH ECS III requirements for:

- Lot 1: commercial-off-the-shelf (COTS) desktop, laptop and handheld computing devices (including peripherals), workstations, software, and networking equipment,
- Lot 2: commercial telecommunications equipment items related to telephony (including, but not limited to, network routers, switches, repeaters, and cabling),
- Lot 3: scientific research workstations, and other electronic devices and systems,
- Lot 4: software (including operating systems),
- Lot 5: related warranty and maintenance services, and
- Lot 6: related support services.

**C.1.2.** The ECS III contract provides a mechanism to acquire IT resources in production at the time of acquisition, for the NIH Institutes and Centers, and for other Federal agencies. The NIH seeks to acquire state-of-the-art commodities including electronics and computing devices capable of executing the latest generation of software under Microsoft Windows XP/.NET, Mac and UNIX (primarily SUN, SGI, and Linux) operating systems.

**C.1.3.** The following definition of Information Technology is used in this contract (FAR 2.101, Definitions):

“Information technology” means any equipment, or interconnected system(s) or subsystem(s) of equipment, that is used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information by the agency.

(1) For purposes of this definition, equipment is used by an agency if the equipment is used by the agency directly or is used by a contractor under a contract with the agency that requires—

- (i) Its use; or
- (ii) To a significant extent, its use in the performance of a service or the furnishing of a product.

(2) The term “information technology” includes computers, ancillary equipment, software, firmware and similar procedures, services (including support services), and related resources.

(3) The term “information technology” does not include any equipment that—

- (i) Is acquired by a contractor incidental to a contract; or
- (ii) Contains imbedded information technology that is used as an integral part of the product, but the principal function of which is not the acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information. For example, HVAC (heating, ventilation, and air conditioning) equipment, such as thermostats or temperature control devices, and medical equipment where information technology is integral to its operation, are not information technology.

## C.2. OPERATIONAL ENVIRONMENT

**C.2.1.** Although the NIH's current networking environment is based on the IEEE 802.3 and IEEE802.11x standards, with Transmission Control Protocol/Internet Protocol (TCP/IP) and vendor-proprietary protocols such as IPX, and Appletalk, it is not known what the environment will be at the time that this contract expires. Therefore, the purpose of this contract is to provide equipment to maintain currency of the installed base of desktop, fileserver, and workstation computers as well as provide a source for first time procurement of IT commodities and services.

**C.2.2. Desktop, Workstation and Fileserver Computing Environment** The equipment shall be used in various environments at the NIH. The three primary user communities are: Intramural Research Programs, which consist of biomedical researchers and staff, and of hospital personnel and staff; Extramural Programs, which consist of health science administrators and staff; and NIH administrators (budget, personnel, procurement, clerical, service support staff, and action officers, etc.) and staff. There is a range of users in each of the previous categories, from novice to power users. There is a range of requirements for each of the user communities. For example, the Intramural Research Programs use desktop machines to perform tasks such as creating scientific manuscripts, and the same machine may be used to operate a piece of scientific research equipment.

**C.2.3. Business Procedure Environment** The NIH Information Technology Acquisition and Assessment Center (NITAAC), with the assistance of NIH Institutes and Centers, will maintain a record of all information relevant to order processing and contract administration. Product information such as descriptions, prices, and specifications shall be electronically and remotely accessible by NIH customers and other users of this contract (the Department of Health and Human Services, and other Federal Agencies) within 15 business days after contract award. Contractors should be prepared to comply with the NITAAC designated Internet implementing convention that will allow catalogue product search capability and on-line ordering. The minimum required elements of the on-line catalogue are CLIN, product description (including salient characteristics), OEM part name and part number, and ECS III price. In addition, each Contractor shall establish a single e-mail address for the purpose of receiving Requests for Quotations from the NITAAC ECS III Quoting System.

**C.2.4. Processing Fee** Contractors shall collect for NITAAC a ½ % processing fee on all delivery orders placed through the ECS III. The collected fees shall be remitted to NITAAC monthly.

### C.2.5. RESERVED.

**C.2.6. Electronic Commerce** In accordance with the Government Paperwork Elimination Act (GPEA, see OMB Memorandum M-00-10), NITAAC is implementing to the greatest degree possible the paperless processing of all NIH ECS III orders, reports, pricing information, and other relevant business documents.

**C.2.7. Electronic Data** The Contractor must be able to transmit, receive, and process electronic documents. They must comply with published government data conventions and implementation guidelines including NIH's IT architecture. All transactions will be conducted in a secure manner (public/private key encryption, authentication, non-repudiation) whether the transport mechanism is the Internet or a Virtual Private Network (VPN).

**C.2.8. Electronic Commerce and www Electronic Catalogue Implementation** The ECS III Contractor shall make available to NITAAC, NIH Institutes and Centers (ICs), and authorized users of this contract, within 15 business days of contract award, a full complement of contract related resources, documents, and information like those described in C.2.3 above, on the World Wide Web. In addition, the Contractor agrees to accept orders placed against the NIH ECS III Contract, issue invoices, and receive payment through electronic commerce implemented by NIH and approved by the NITAAC. Contractors shall provide a central corporate e-mail address for

ECS III Business (for example, [ECSIII@company-name.com](mailto:ECSIII@company-name.com)). For the purpose of evaluation, the Contractor shall provide a URL address to view its proposed electronic catalogue.

**C.4.1.2** An item is also "commercially available" if it has evolved from an item described as a commercial item in C.4.1.1, above, through advances in technology or performance and that is not yet available in the commercial marketplace, but will be available in the commercial marketplace in time to satisfy the delivery requirements under an ECS III order. (See "Commercial item" in FAR 2.1.)

**C.4.1.3** "State-of-the-art" is defined as recently designed components, which are in current production, marketed, available, and maintained.

**C.4.1.4** To be in "current production", an item must be completely constructed with components specified by the manufacturer for that equipment, and those component types (not necessarily the specific components) must have been manufactured within the last 180 calendar days.

**C.4.2** Open market items, also known as incidental items, are defined as items that are not currently available as a contract line item (CLIN) on the ECS III contract. The contractor may offer open market items to ECS III customers if the following conditions apply:

All desktop, file server, Web server, and application server systems shall be certified for the current version of Windows (contained in the Microsoft Hardware Compatibility List, or HCL) within 12 months of the date they are proposed. The 12-month period is intended to provide Microsoft with sufficient time to evaluate and certify the offering. Systems that are delivered prior to appearance on the NIST POSIX approved products listing and Windows HCL certification will be retrofitted or replaced for compliance, if necessary, at no cost to Government.

**C.5.3 EPA ENERGY STAR®.** The Contractor shall offer equipment that is ENERGY STAR® compliant, whenever available. For product groups where ENERGY STAR® labels are not yet available, the Contractor shall offer products that are in the upper 25 percent of energy efficiency as designated by the Federal Energy Management Program (FEMP). The sole ENERGY STAR® requirement shall be the self-certification by the Contractor that the offered equipment is ENERGY STAR® compliant. If any ENERGY STAR®-designated equipment fails to meet ENERGY STAR® requirements, the Contractor shall replace, not retrofit, at no additional cost to the Government, all equipment it delivers under this contract to be ENERGY STAR® compliant as determined by the EPA sanctioned test. All subsequent deliveries of equipment shall also be ENERGY STAR® compliant as determined by the EPA sanctioned test. Equipment specifically exempted from EPA ENERGY STAR® requirements (e.g., multi-user systems) is exempt from the requirements of this section.

**C.5.4 Security.** The Contractor must provide assurances that it meets the safeguards outlined in the Office of Management and Budget Circular A-130, Management of Federal Information Resources, and the HHS Cybersecurity Program Policy. The Contractor may be required to provide a written security plan prior to performance that addresses the safeguards required by delivery orders.

**C.5.4.1** Information, computer systems, LANs, and other telecommunications systems at NIH should be considered to be categorized as high criticality/high sensitivity systems, unless otherwise identified by the Government. See Section H.11 for additional information.

**C.5.4.2** The Contractor shall agree to establish and follow any additional security precautions considered by NIH to be necessary to ensure proper and confidential handling of data and

information. A written agreement between NIH and the Contractor shall be reached before data and information otherwise exempt from public disclosure may be disclosed to the Contractor. The Contractor must include these requirements in any subcontract awarded under the prime contract.

**C.5.4.3.** Contractor personnel shall be granted rights of entry to and exit from those NIH and other Government facilities required for performance of work under this contract. Contractor employees shall comply with all applicable directives and policies regarding conduct of personnel and operation of the facility. The Government reserves the right to require Contractor personnel to "sign-in" upon entry to and "sign-out" upon exit from any Government facility.

**C.5.4.4.** The Contractor shall secure and protect all Contractor-owned property and equipment brought into Government facilities during performance of work under this contract. The Government shall not be held liable for loss of or damage to Contractor-owned property or equipment brought into Government facilities. The Contractor shall remove any Contractor-owned property deemed inappropriate by the Government, for any reason, from the Government facility in which it is found.

**C.5.4.5.** Under no circumstances are Contractor personnel permitted to use Government equipment, software, or supplies for purposes other than performance of this contract.

**C.5.4.6.** All Contractor employees must be United States citizens, legal residents of the United States, or aliens authorized temporary employment in the United States before they can be employed under this contract. All Contractor employees and sub-Contractor employees must sign a "[Commitment to Protect Non-Public Information - Contractor Employee Agreement](http://ocio.nih.gov/docs/public/Nondisclosure.pdf)" form (<http://ocio.nih.gov/docs/public/Nondisclosure.pdf>). The Contractor will be held liable for any inappropriate disclosure of information/data by its employees or via any system used by the Contractor. Should the Contractor become aware of the need for additional safeguards, it must notify the COTR immediately. See Section H.11 for additional information.

**C.5.5. Americans with Disabilities Act** All equipment and services provided by the Contractor(s) shall comply with ADA requirements. Specifically, equipment offered must be adaptable to meet the requirements of persons with disabilities, where such adaptations would not place an undue burden on the manufacturer.

## **C.6 DESKTOP COMPUTER REQUIREMENTS**

The Contractor shall establish, operate, and manage the NIH Electronic Commodities Store, ensuring that necessary hardware, software, maintenance, training, and documentation are available to satisfy the NIH desktop computing needs. Due to the wide range of Personal Computers in use at the NIH, the Contractor(s) shall provide a wide range of equipment from a wide range of Original Equipment Manufacturers. The Contractor is also strongly encouraged to consider providing equipment that may be beyond the requirements of the NIH in order to address the requirements of other Federal Agencies that will utilize this acquisition vehicle. For example, the Contractor may consider C2 security requirements, or National Security Agency certification requirements, in selecting OEM equipment to offer.

## **C.7 EQUIPMENT REQUIREMENTS.**

**C.7.1** The wide range of network equipment currently in use at the NIH requires a wide range of network equipment and accessories to ensure the preservation of capital investments in LAN/WAN infrastructure and operability. The primary topology for any NIH LAN is 10Base-T, 100Base-T, or ATM. In addition, the NIH requires network and telephony equipment such as, but not limited to storage and application (including WWW) servers, storage area networks, wireless hubs, and telephonic devices and services.

**C.7.2** The broad range of NIH's functions in health, biomedical research, statistics, and science in general requires a broad range of computational requirements for UNIX based workstations and

support equipment. The functional categories of workstations and accessories required by users of the ECS III include Data Servers, and High-performance Graphics Workstations

**C.9 RESERVED.**

**C.10. RESERVED.**

**C.11. WARRANTY.**

The Contractor may, at its discretion, offer, as separately priced, extended warranties for warranty coverage beyond the minimum OEM warranty period, and may offer terms including decreased (faster) response times and on-call, on-site support.

**C.11.2. On-Site Locations.** The Contractor shall provide warranty service for all equipment delivered by the Contractor under this contract to the Washington D.C. metropolitan area. The Government recognizes that the terms of this section may be met by OEM warranty terms.

**C.11.3. Locations outside the Washington D.C. metropolitan area.** The Contractor shall provide a method for warranty, which may be separately priced, for equipment the Contractor delivers to locations not listed in the paragraph above. The Contractor shall provide for repairing the equipment, including the means to transport the systems. The Contractor shall bear all shipping costs and responsibilities both to and from the Government site.

**C.11.4. Coverage Period.** The warranty period will commence upon date of delivery to the Government. User receipt of an item that is inoperable upon delivery shall be resolved in accordance with the warranty provisions of the contract. After any warranty work, the newly installed part shall become Government property. The defective part shall become the property of the Contractor except the Government reserves the right to purchase defective hard drives and removable hard drives containing sensitive or classified material that is required by statute or regulation to be destroyed or retained by the Government. The effective warranty for all replacement items installed during the initial warranty period shall be the greater of (1) the remaining warranty period on the original item or (2) a 90 calendar day warranty period provided with each replacement item. All replacement parts shall conform to technical specifications and architectural standards as described in this contract.

**C.11.5. New or Warranted Parts.** Only new parts or parts warranted by the OEM as equal to new shall be utilized for replacement when repairs are made.

**C.11.6. Time to Repair.** Equipment or software (including documentation) delivered to all Washington D.C. metropolitan area locations shall be repaired or replaced, and fully operational within two (2) working days following notification to the Contractor's designated technical support personnel of the need for warranty service. Equipment or software (including documentation) delivered to all other area locations shall be repaired or replaced, and fully operational within five (5) working days following notification to the Contractors' designated technical support personnel of the need for warranty service. Temporary replacement equipment may be used to satisfy this requirement provided that the replacement equipment is provided at no additional cost to the Government, and that it is functionally equivalent or exceeds equivalence to the equipment being repaired or replaced.

**C.11.7. Warranty Conditions.** The Government shall be able to upgrade PC systems by inserting items or attaching other devices such as third party cards or disk drives without voiding the warranty on items delivered under this contract. Substitutions and additions of equipment not

manufactured or supplied by the Contractor shall be subject to the following: (1) The Contractor will not be responsible for damage caused to the original equipment provided the damage results from the use of third party equipment, and (2) The Contractor will not be responsible for defects or overall system performance degradation if such defects or performance degradation result from the use of third party equipment.

## **C.12. TELEPHONIC SUPPORT.**

**C.12.1.** The Contractor shall provide telephonic support via a toll free number.

**C.12.2. Availability.** Telephonic support services shall be available, as a minimum, Monday through Friday, 8:00 a.m. through 6:00 p.m. Eastern Time, excluding U.S. Government holidays. Recorded answering services are not acceptable to the Government during those times. The Contractor(s) shall provide a method for telephonic support services, such as a Fax-back service, a paging service, or third-party support service, for worldwide support. For requests for telephonic support originating outside the Continental United States, the Contractor shall respond no later than the next business day.

**C.12.3. Services.** As a minimum, Telephonic Support Services shall consist of the following:

**b) User Technical Assistance.** The Contractor shall be prepared to receive product problem reports and assist the user towards timely resolution of the reported problem. Reports of problems may also come through e-mail and/or Internet/WWW messaging. The Contractor is responsible for hardware/software related calls for all products which are covered under warranty. The Contractor shall maintain contact with the reporting user until final resolution and user notification. Interim resolution of a software problem shall include a work around solution until the problem is finally corrected in the next release or version of the product. Technical assistance may be provided by the OEM to satisfy this requirement.

**C.12.3.1. Telephonic Support Personnel.** Contractor's personnel manning the telephonic support service telephones shall have sufficient expertise to recommend corrective actions for hardware and software problems, and the personnel shall speak and understand English.

#### **H.5 DELIVERY ORDER PROCEDURES**

**H.5.1** For purposes of this contract and all modifications issued under this contract, the term "delivery order" includes the following:

Delivery orders  
Purchase card transactions  
NIH record of call

The term "best value" means the expected outcome of an acquisition that, in the Government's estimation, provides the greatest overall benefit in response to the requirement (FAR 2.101).

#### **H.5.2 Customer's Responsibilities**

**H.5.2.1 Market Research** Upon determining its requirements, the customer performs market research and determines whether or not a contractor can provide the IT products/services required. All sources should be accessed to determine the best value to the Government for the product or service. The ECS III "Prime Contractor" list on the NITAAC website ([nitaac.nih.gov](http://nitaac.nih.gov)) indicates which Lot(s) each Contractor offers and gives a URL for the Contractor's website. Contractor catalogs can be accessed through the Contractor's website.

**H.5.2.2 Request For Quotation** In order to meet the FAR requirement at FAR 16.505(b) for "fair opportunity to be considered", the Customer shall consider all the ECS III Contractors for a delivery order requirement who have received an award in the ECS III Lots(s) covered by the

delivery order requirement (qualified contractors). This includes determining whether or not the contractor can provide the IT products/services required. All eligible sources should be accessed to determine the best value to the Government for the product or service. Unless an exception to the Fair Opportunity to be Considered (FOC) requirement exists, the NITAAC ECS III Quoting System automatically ensures fair opportunity by disseminating the RFQ to all qualified Contractors.

The Customer shall then make a best value judgment by comparing all the quotations received before awarding the delivery order. See Section 5.1 for the definition of "best value." The Customer must document the rationale if the lowest priced offer was not accepted, including the basis for the award and the rationale for any tradeoffs among price and non-price considerations (see FAR 16.505(b)(4)).

**H.5.2.3 Exception to Fair Opportunity to be Considered** The Customer, taking into consideration price, delivery scheduling, past performance, quality, etc., performs a best value analysis and documents the source selection decision in its official task order file. If the decision is made that one of the exceptions to the "fair opportunity to be considered" process contained at FAR 16.505(b)(2) applies, the rationale for the use of the exception chosen must be fully documented in the official delivery order file, and signed by the Agency Contracting Officer or other designated agency official appointed in accordance with agency regulations.

#### **H.5.2.4 RESERVED.**

**H.5.2.5 Quotes** The Customer shall only consider a quote submitted by an ECS III Prime Contractor, not by an affiliate of the Prime Contractor (e.g., business partner, subsidiary or subcontractor).

#### **H.5.2.6 RESERVED.**

#### **H.5.2.7 RESERVED.**

**H.5.2.8 Accountable Management Official** The order must be signed by the customer's Accountable Management Official (AMO) (See Section G.3).

**H.5.2.9 Delivery Order Close-out** When the Customer has determined that all delivery order requirements were met and the delivery order performance is complete, the Contracting Officer's Technical Representative (COTR) and the AMO sign the acceptance of the final product or completion statement. This ensures that all DO requirements were met, that is, all deliverables were received on time and were technically acceptable, all the Government Furnished Products (GFP) or Government Furnished Information (GFI) have been appropriately distributed, etc. The signed acceptance or delivery order is forwarded back to the originating procurement office and placed in the official procurement file.

### **H.5.3 Contractor's Responsibilities**

**H.5.3.1 Quotes** Any quote submitted to a customer under ECS III shall only be submitted by an ECS III Contractor, not by an affiliate of the Contractor (e.g., business partner, subsidiary or subcontractor).

#### **H.5.3.2 ECS III Tracking Number and Contract Line Item Numbers**

**The Contractor shall not accept a DO from a customer that does not contain the NITAAC ECS III Tracking Number and list of CLINs for the items being ordered.** Upon receipt, the Contractor shall validate the accuracy of all delivery orders and work with the customer to ensure that the NITAAC ECS III Tracking Number and list of CLINs has been provided on the orders.

**H.5.3.3 Processing Fee** Upon receipt of each delivery order placed against this contract by a customer, the Contractor shall review the order to ensure that the delivery order total contains the NIH ½ % processing fee. If the NIH ½ % processing fee is omitted or is calculated incorrectly, or the order amount is incorrect, the Contractor must contact the customer and request a corrected delivery order before it can be accepted.

#### **H.5.3.4 RESERVED**

**H.5.3.5 Monthly Sales Report** The Contractor shall upload a complete copy of each delivery order along with the monthly sales report submitted to the NIH in accordance with Section II, Section G.5 of the contract.

**H.5.3.6 Delivery Order Modifications** The Contractor shall clearly identify all delivery order modifications with the original ECS III Tracking Number and a numerical extension (e.g. 01, 02, 03 etc.) that corresponds to the appropriate modifications.

**H.5.3.7 Procedure Compliance** If the Contractor does not comply with these procedures, it will be subject to a moratorium, of this contract, during which it may not accept any new orders.

**H.5.3.8 Delivery Order Close-out** Upon completion/acceptance of the delivery order, the Contractor submits the final invoice to the COTR and AMO. This invoice shall include a statement that the invoice is a “final” invoice and that all costs have been accounted for and billed.
